

David Beregoi

Lead / Principal-leaning Front-End Engineer (React · Next.js · TypeScript)

Tailored for Intetics — Lead/Principal Front-End Architect (1137)

afterwayx@gmail.com · +373 62015030 · Chişinău, Moldova · afterwayx.com · github.com/AfterWayX

Profile match for this role

Senior engineer with **5+ years** owning React / Next.js / TypeScript frontends in production SaaS and enterprise B2B products. Strengths this role lists: **Next.js architecture**, **Core Web Vitals**, **distributed delivery**, and **AI-agent workflows (Cursor, Claude Code, MCP)**. Experience leading end-to-end platform work with stakeholders; ready to formalize that as Front-End Architect ownership.

Selected impact

- Frontend architecture & reusable systems across micro-frontends and multi-app product surfaces
- Core Web Vitals, SEO, and performance optimization on data-heavy dashboards
- Real-time enterprise B2B logistics UI + event-driven workflows
- Specs and delivery workflows optimized for human + AI-agent execution (Cursor / Claude Code)

Experience

Senior Full-Stack Engineer — Business Plane Group · 05/2023 – Present

Enterprise B2B logistics platform (global customers)

- Own frontend and full-stack delivery for mission-critical logistics product surfaces
- Architect React/TypeScript UI with NestJS/Express backends, real-time WebSockets, PostgreSQL
- Drive technical breakdown with stakeholders; ship production features with AWS + CI/CD ownership
- Unblock delivery across backend, frontend, and infrastructure concerns

Full-Stack Engineer — Corlabtech · 05/2022 – 05/2023

AI analytics / visualization platforms

- Built React / Next.js / TypeScript dashboards for AI-generated insights
- Designed reusable frontend architecture and component libraries (micro-frontends)
- Improved **Core Web Vitals**, SEO, and application performance across products

Full-Stack Engineer — Qorporates / Qoobus · 01/2021 – 05/2022

Company intelligence platform (100M+ records)

- Frontend + backend for large-scale search/discovery UX over Elasticsearch-backed data
- Performance-sensitive UI and data workflows at high volume

Full-Stack Engineer — Minicode · 03/2020 – 01/2021

Product / agency web — React, JavaScript, Node.js, UX-focused UI delivery

Skills aligned to the posting

Area	Evidence
React / Next.js / TypeScript	Primary stack across all recent roles
Performance / CWV	Explicit ownership at Corlabtech
Architecture & standards	Component libraries, micro-frontends, production system design
AI agent workflows	Cursor, MCP, Claude Code, LLM workflows (daily practice)

Client / stakeholder communication	Direct collaboration on Business Plane Group
Testing	Jest, React Testing Library, Cypress

Languages

English — Professional/Advanced · Romanian — Native · Russian — Native

Note on commerce platforms

No production Shopify Plus / SFCC / BigCommerce tenure yet. Transferable: enterprise B2B product architecture, headless-style API-driven frontends, Next.js performance engineering, and AI-assisted delivery standards. Eager to apply those to commerce clients under Intetics architecture leadership.
